

1 Introduction

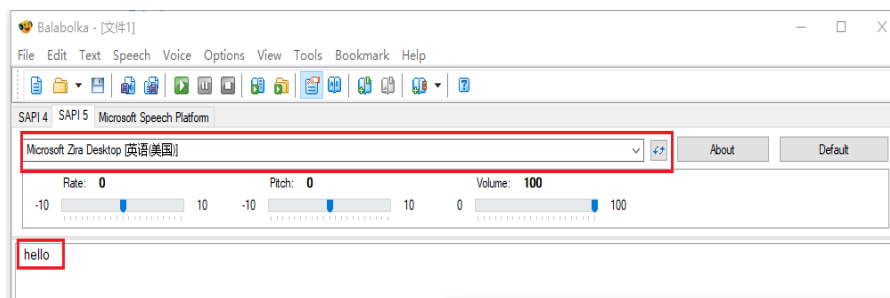

Part 2 explains how MP3 files are generated, and part 3 explains how SND files are generated.

2 Generate MP3 files

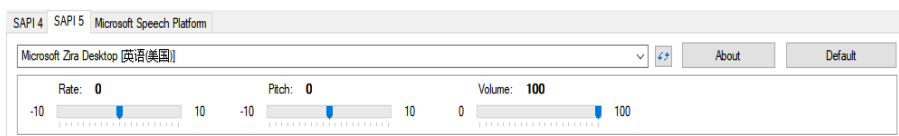

2.1 Generate MP3 files through Balabolka, go to the Balabolka folder, and click on Balabolka, you don't need to install it.

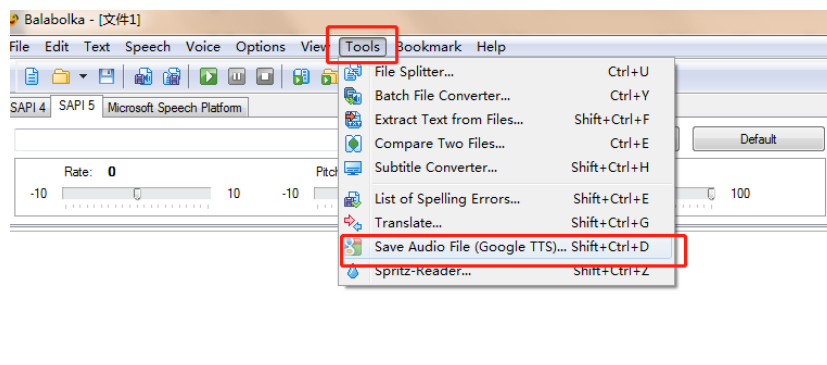

2.2 In the first red box, you can select the language, and in the second red box position you can enter the text you want to generate the speech.

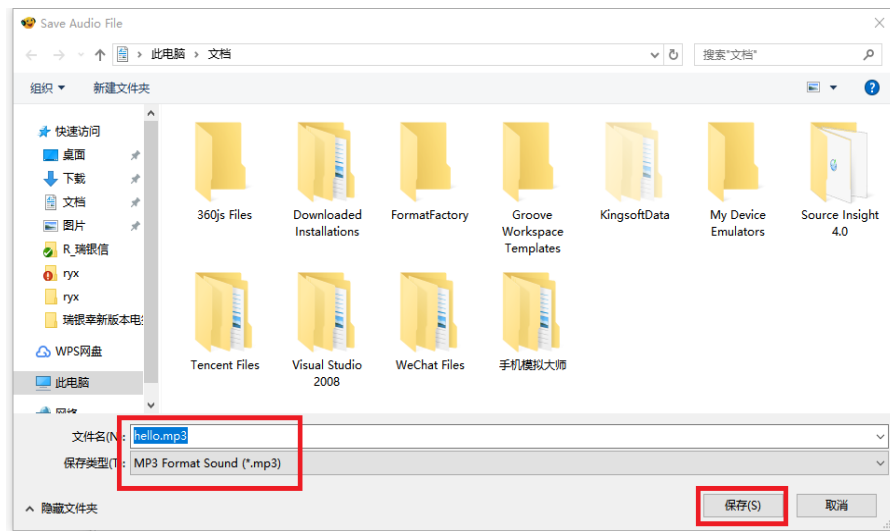

2.3 At the top of the set read language, speed, intonation and other sound information.

2.4 Once set, click the Tools TAB to save the audio file.

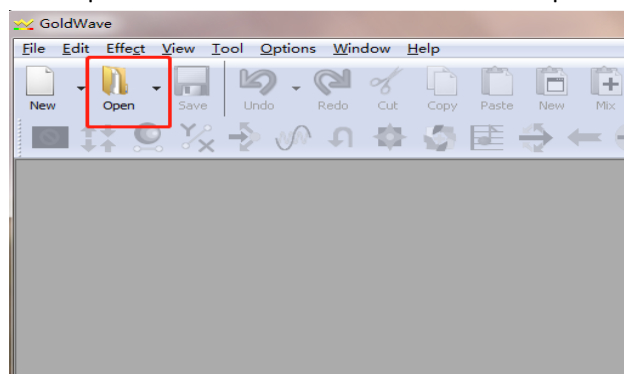

3 Generate SND files

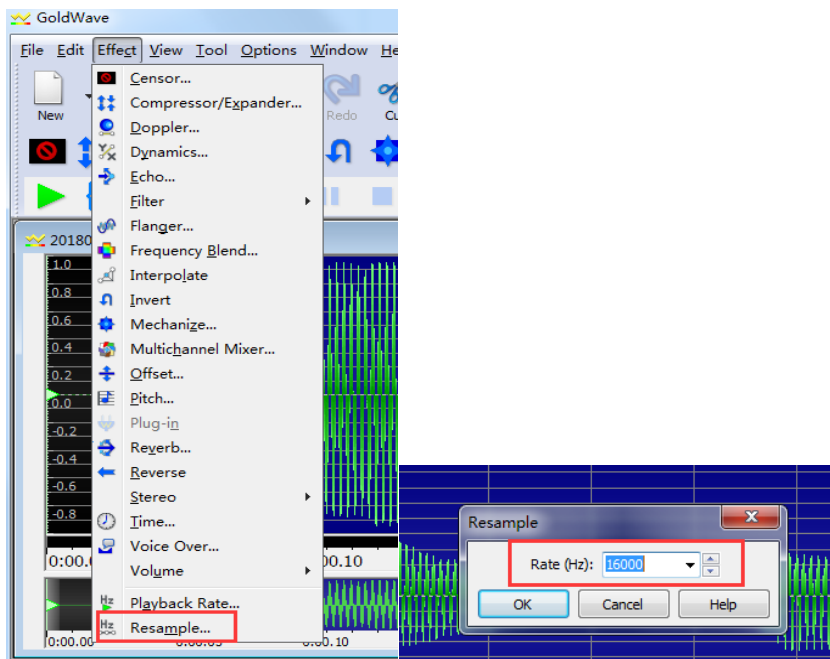

If you want to Generate SND files, you need to prepare the MP3 files first and convert them to SND format through goldwave. Here are the steps.

3.1 Install goldwave on computer

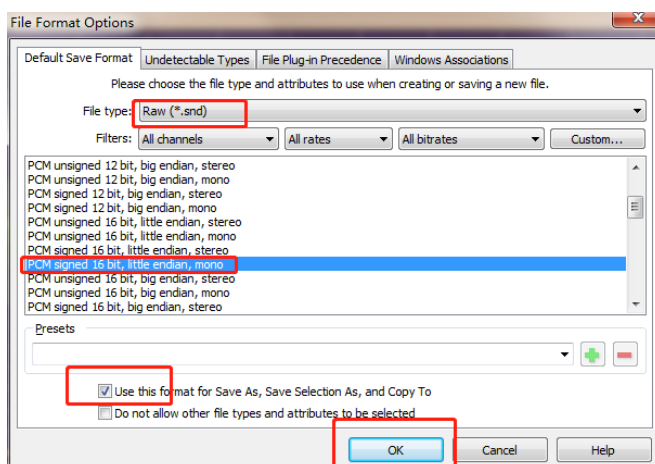

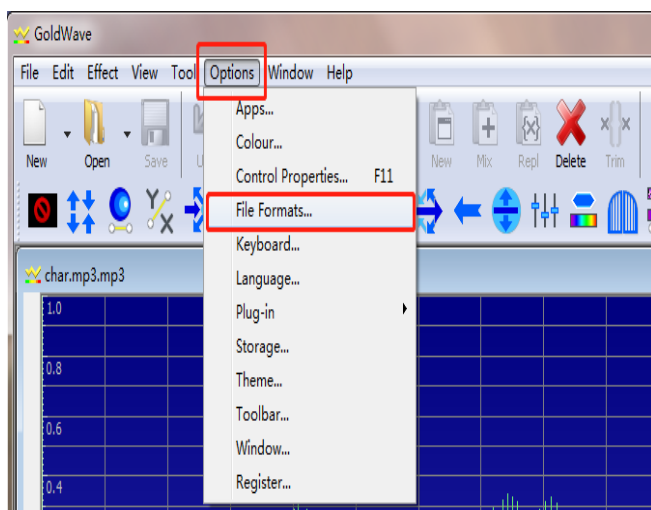

3.2 Open the MP3 file and select Effect-Resample to modify the sampling frequency to 16K.

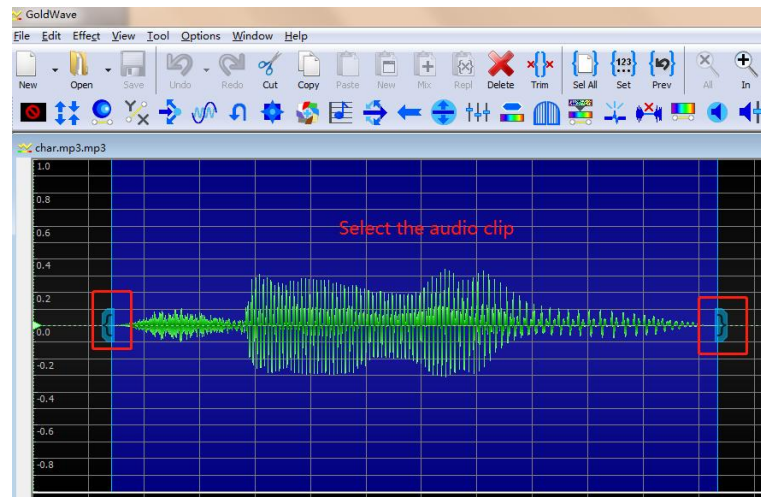

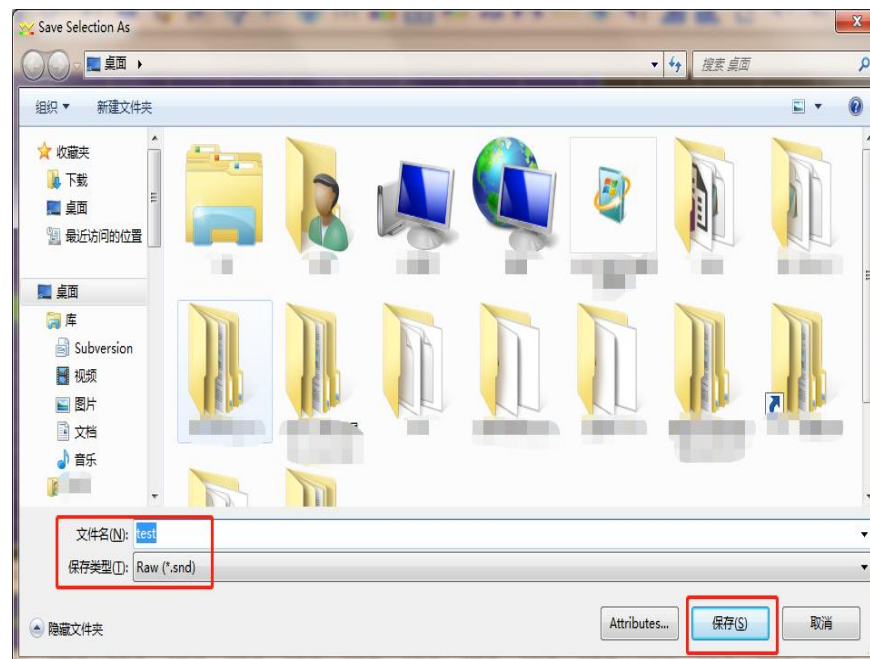

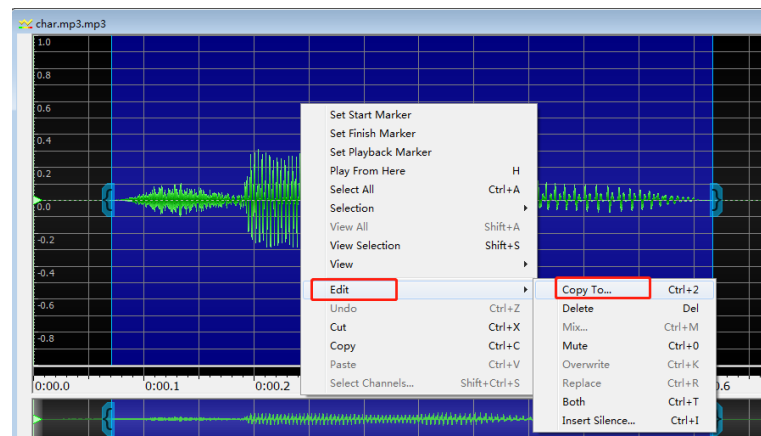

3.3、Set file format

3.4 Select the audio clip

3.5 Save file

4 Finally, you can read *Pack and download data*, download to ET380.
